PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Developer with 5 years of experience building production web applications in React, Angular, JavaScript, and TypeScript across SaaS, eCommerce, ERP, and EdTech products, with hands-on experience building REST APIs in Node.js, Express.js, and MongoDB. Currently improving frontend performance and WCAG accessibility across live SaaS products at Symmetry Group. Owns work end to end, from design handoff and component architecture through API development and integration, responsive UI, data visualization, testing, and release. Also experienced customizing Odoo with QWeb themes and modules. Uses AI-assisted development (Cursor, GitHub Copilot, Claude) daily within agile, Git-based workflows to ship faster.

TECHNICAL SKILLS

Languages, Frameworks and Libraries: React.js, Angular, Next.js, jQuery, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

UI and Styling: Bootstrap, TailwindCSS, Responsive and Mobile-First Design, Component-Based UI, Design-to-Code Implementation

Animation and Data Visualization: GSAP, AOS (Animate On Scroll), CSS Animations and Transitions, Chart.js

Performance and Accessibility: Frontend Performance Optimization, Web Accessibility (WCAG), Semantic HTML, Cross-Browser Compatibility

APIs and Integration: REST APIs, JSON, Postman

Platforms, CMS and ERP: Odoo (theme development, custom modules, QWeb), WordPress

Backend: Node.js, Express.js, MongoDB; familiar with PHP, Symfony, Laravel, Blade Templating (frontend work within existing codebases), PostgreSQL (basic querying and schema awareness)

Testing and QA: Manual Testing, Functional Testing, Cross-Browser and Cross-Device Testing, Responsive/UI Testing, Regression Testing, Bug Reporting and Tracking

Tools and Version Control: Git, GitHub, VS Code, Chrome DevTools, Browser Debugging

Methodologies and PM: Agile/Scrum, Sprint Planning, Jira, Trello, ClickUp

AI-Assisted Development: GitHub Copilot, Cursor, Claude

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Symmetry Group
Mar 2026 - Present

- Built the frontend of Zellio (zellio.net) from scratch, an invoicing SaaS for users, in React.js and PHP Blade templates, including the customer dashboard, and integrated REST APIs across the application.
- Developed Zellio's user management module in Node.js, Express.js, and MongoDB, building CRUD REST APIs with role-based access control enforced through a chain of custom Express middleware for authentication and role permissions.
- Improved the logo studio on LogoDesign.net, the product's core design editor, refining layout and mobile experience while raising WCAG accessibility compliance and optimizing frontend code.
- Revamped the legacy frontends of ZillionDesigns (zilliondesigns.com) and DesignMantic (designmantic.com), replacing dated layouts with modern responsive UI and improving accessibility, performance, and code quality.
- Built interactive dashboard and reporting UI with Chart.js, powered by Node.js/Express.js endpoints serving MongoDB data, and added scroll-based and timeline animations with GSAP and AOS to product and marketing pages without regressing load performance.
- Used AI-assisted development tools (GitHub Copilot, Cursor, Claude) daily to scaffold components, refactor legacy frontend code, and review changes across large Symfony and Laravel codebases, shortening delivery time on routine work.

Frontend Developer | Oakland (Odoo Gold Partner, UAE)
Nov 2023 - Feb 2026

- Led development of Oakland's official website end to end, from planning through deployment, including a Marketplace for add-on listings, a Helpdesk ticketing interface, and multiple landing pages, consolidating previously scattered product information into a single digital presence and reducing client onboarding friction.

- Built 7md, a large-scale eCommerce platform, from scratch on Odoo, developing custom QWeb themes and modules to deliver a fully responsive, performance-optimized shopping experience supporting thousands of SKUs.
- Engineered a dynamic "Customize Your Gift" configurator for BasicBlooms, a gift eCommerce platform, extending Odoo themes with interactive product-customization UI that improved customer engagement and average order value.
- Maintained a portfolio of 5+ responsive, cross-browser-compatible websites with consistent sub-3-second load times, implementing designs to spec across all breakpoints.
- Manually tested each release across browsers, devices, and breakpoints before deployment, validating forms, cart and checkout flows, and responsive layouts, then logged and tracked defects through to resolution.
- Implemented scroll-triggered and timeline-based animations with GSAP and AOS across landing pages and marketing sections, adding motion and interaction polish while holding load times within performance targets.

Frontend Developer | GNT Group - Krystosoft
Nov 2022 - Nov 2023

- Built Sastatareen, a mobile-first Angular PWA for a multi-vendor grocery marketplace backed by Node.js, Express.js, and MongoDB, implementing real-time store proximity matching and cross-vendor price comparison that improved user retention and session depth.
- Developed Avatar Academy, an Angular e-learning portal with course enrollment, progress tracking, and role-based content access, supporting distinct onboarding flows for learners and instructors.
- Delivered a React.js coworking space platform presenting bookable rooms and office inventory through an interactive, conversion-focused booking UI, with Node.js/Express.js REST APIs and MongoDB managing rooms and bookings.
- Extended a rent management system with separate customer and admin panels, enabling property, tenant, and contract management with secure document access.
- Contributed to agile sprint planning and reviews, performing functional and regression testing on delivered features and giving UI/UX feedback that improved layout consistency and usability across the product suite.

Junior Frontend Developer | Designer Dev
Sep 2021 - Nov 2022

- Built the frontend for Dalilee, a courier and delivery platform operating in Oman, delivering real-time package tracking across regions in a fully responsive, localized interface.
- Developed a corporate portfolio and services website with dynamic forms and animations, verified for cross-browser compatibility across Chrome, Firefox, Safari, and Edge.
- Reviewed UI/UX mockups for technical feasibility before build, resolving design-to-implementation gaps early and preserving visual fidelity within project constraints.

Frontend Developer Intern | Devnest
Jun 2021 - Aug 2021

- Contributed frontend work to live production eCommerce projects, applying responsive markup and frontend best practices under senior review.

PROJECTS

AI-Powered Online Exam Proctoring System | Final Year Project, 2022
Python, *Flask*, *JavaScript*, *HTML*, *CSS*, *Bootstrap*, *AI / Computer Vision*

- Designed and built a full-stack exam proctoring platform using computer vision on live webcam feeds to monitor student behavior in real time, automatically flagging looking away, tab switching, and unauthorized presence.
- Developed a student-facing CMS with account registration, authentication, and profile management, allowing students to self-enroll and access assigned exams from a personalized dashboard.
- Implemented a Python/Flask backend to process video streams, run AI-based activity analysis, and log monitoring events for administrator review after the exam.

EDUCATION

Bachelor of Computer Science
Iqra University, Karachi | 2018 - 2022 | CGPA 3.5 / 4.0
