PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 5+ years of experience building scalable, high-performance web applications across eCommerce, ERP, EdTech, and SaaS domains. Proven track record of leading end-to-end development in Angular and React, customizing Odoo platforms, and delivering pixel-perfect, mobile-first UIs that directly improve business outcomes. Adept at collaborating in agile, cross-functional teams and leveraging AI-assisted development tools to accelerate delivery and maintain code quality.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frameworks & Libraries: Angular, React.js, jQuery, Bootstrap, TailwindCSS

ERP & CMS: Odoo (Theme Dev, Custom Modules, QWeb), WordPress

APIs & Tools: REST APIs, Postman, Git, GitHub, VS Code

Project Management: Jira, Trello, ClickUp, Agile/Scrum

Databases: PostgreSQL (basic querying & schema awareness)

Core Competencies: Responsive Design, Mobile-First, Cross-Browser Compatibility, Pixel-Perfect UI, Performance Optimization

AI & Automation: AI-Powered App Development, AI-assisted Dev (GitHub Copilot, Cursor AI, Claude)

PROFESSIONAL EXPERIENCE

Frontend Developer | Oakland

Nov 2023 – Feb 2026

- ▶ Led end-to-end development of Oakland's official website from planning through deployment, including a Marketplace for add-on listings, a Helpdesk ticketing system, and multiple high-conversion landing pages — resulting in a consolidated digital presence that reduced client onboarding friction.
- ▶ Architected and delivered a large-scale eCommerce platform (7md) from scratch on Odoo, building custom QWeb themes and modules that achieved a fully responsive, performance-optimized shopping experience supporting thousands of SKUs.
- ▶ Extended and customized Odoo themes for BasicBlooms, a gift-based eCommerce platform, by engineering a dynamic 'Customize Your Gift' configurator — directly improving customer engagement and average order value.
- ▶ Maintained a library of 5+ responsive, cross-browser-compatible websites with consistent sub-3-second load times, adhering to pixel-perfect design specs across all breakpoints.
- ▶ Rapidly aligned with diverse project-specific frameworks and delivery timelines, consistently meeting deadlines across concurrent client engagements.

Frontend Developer | GNT Group – Krystosoft

Nov 2022 – Nov 2023

- ▶ Built Sastatareen, a mobile-first Angular PWA multi-vendor eCommerce platform, enabling real-time store proximity matching and price comparison for grocery shoppers — driving measurable improvements in user retention and session depth.
- ▶ Developed Avatar Academy, an Angular-based e-learning portal with course enrollment, progress tracking, and role-based content access, supporting a smooth onboarding flow for learners and instructors.
- ▶ Delivered a React.js coworking space platform showcasing bookable rooms and office inventory with an interactive, conversion-optimized UI.
- ▶ Enhanced a rent management system with dual customer and admin panels, enabling streamlined property, tenant, and contract management with secure document access.

- ▶ Participated in agile sprint reviews and planning sessions, providing actionable UI/UX feedback that improved layout consistency and usability across products.

Junior Frontend Developer | Designer Dev

Sep 2021 – Nov 2022

- ▶ Built the frontend for Dalilee, a courier delivery platform in Oman, enabling real-time package tracking across regions with a fully responsive, localized interface.
- ▶ Developed a portfolio and services website for an IT company, integrating dynamic forms, animations, and ensuring cross-browser compatibility across Chrome, Firefox, Safari, and Edge.
- ▶ Assessed UI/UX mockups for technical feasibility, bridging the design-development gap to maintain visual fidelity while ensuring implementability within project constraints.
- ▶ Worked across multiple projects using HTML, CSS, JavaScript, React.js, and Angular — building versatile, full-spectrum frontend proficiency.

Frontend Developer Intern | Devnest

Jun 2021 – Aug 2021

- ▶ Contributed to live production projects during a hands-on internship, gaining real-world experience with eCommerce website development and frontend best practices.

PROJECTS

AI-Powered Online Exam Proctoring System · Final Year Project

2022

Python · Flask · JavaScript · HTML · CSS · Bootstrap · AI / Computer Vision

- ▶ Designed and developed a full-stack online exam proctoring platform that uses AI and computer vision (via webcam) to monitor student behavior in real time, automatically flagging suspicious activities such as looking away, tab switching, and unauthorized presence detection.
- ▶ Built a student-facing CMS with secure account registration, login, and profile management — enabling students to self-enroll and access their assigned exams through a personalized dashboard.
- ▶ Implemented a Python/Flask backend to process live webcam feeds, apply AI-based activity analysis, and log monitoring events for exam administrators to review post-exam.
- ▶ Delivered an end-to-end system covering the full exam lifecycle: student onboarding, live proctoring, activity logging, and results management — demonstrating full-stack capability across frontend and backend.

EDUCATION

Bachelor of Computer Science

2018 – 2022

Iqra University, Karachi · CGPA: 3.5 / 4.0
